Information About the Maryland Register and COMAR

MARYLAND REGISTER

The Maryland Register is an official State publication published every other week throughout the year. A cumulative index is published quarterly.

The Maryland Register is the temporary supplement to the Code of Maryland Regulations. Any change to the text of regulations published in COMAR, whether by adoption, amendment, repeal, or emergency action, must first be published in the Register.

The following information is also published regularly in the Register:

- Governor's Executive Orders
- Attorney General's Opinions in full text
- Open Meetings Compliance Board Opinions in full text
- State Ethics Commission Opinions in full text
- Court Rules
- District Court Administrative Memoranda
- Courts of Appeal Hearing Calendars
- Agency Hearing and Meeting Notices
- Synopses of Bills Introduced and Enacted by the General Assembly
- Other documents considered to be in the public interest

CITATION TO THE MARYLAND REGISTER

The Maryland Register is cited by volume, issue, page number, and date. Example:

- 19:8 Md. R. 815—817 (April 17, 1992) refers to Volume 19, Issue 8, pages 815—817 of the Maryland Register issued on April 17, 1992.

CODE OF MARYLAND REGULATIONS (COMAR)

COMAR is the official compilation of all regulations issued by agencies of the State of Maryland. The Maryland Register is COMAR's temporary supplement, printing all changes to regulations as soon as they occur. At least once annually, the changes to regulations printed in the Maryland Register are incorporated into COMAR by means of permanent supplements.

CITATION TO COMAR REGULATIONS

COMAR regulations are cited by title number, subtitle number, chapter number, and regulation number. Example: COMAR 10.08.01.03 refers to Title 10, Subtitle 08, Chapter 01, Regulation 03.

DOCUMENTS INCORPORATED BY REFERENCE

Incorporation by reference is a legal device by which a document is made part of COMAR simply by referring to it. While the text of an incorporated document does not appear in COMAR, the provisions of the incorporated document are as fully enforceable as any other COMAR regulation. Each regulation that proposes to incorporate a document is identified in the Maryland Register by an Editor's Note. The Cumulative Table of COMAR Regulations Adopted, Amended or Repealed, found online, also identifies each regulation incorporating a document. Documents incorporated by reference are available for inspection in various depository libraries located throughout the State and at the Division of State Documents. These depositories are listed in the first issue of the Maryland Register published each year. For further information, call 410-974-2486.

HOW TO RESEARCH REGULATIONS

An Administrative History at the end of every COMAR chapter gives information about past changes to regulations. To determine if there have been any subsequent changes, check the "Cumulative Table of COMAR Regulations Adopted, Amended, or Repealed" which is found online at <http://www.dsd.state.md.us/PDF/CumulativeTable.pdf>. This table lists the regulations in numerical order, by their COMAR number, followed by the citation to the Maryland Register in which the change occurred. The Maryland Register serves as a temporary supplement to COMAR, and the two publications must always be used together. A Research Guide for Maryland Regulations is available. For further information, call 410-260-3876.

SUBSCRIPTION INFORMATION

For subscription forms for the Maryland Register and COMAR, see the back pages of the Maryland Register. Single issues of the Maryland Register are \$15.00 per issue.

CITIZEN PARTICIPATION IN THE REGULATION-MAKING PROCESS

Maryland citizens and other interested persons may participate in the process by which administrative regulations are adopted, amended, or repealed, and may also initiate the process by which the validity and applicability of regulations is determined. Listed below are some of the ways in which citizens may participate (references are to State Government Article (SG), Annotated Code of Maryland):

- By submitting data or views on proposed regulations either orally or in writing, to the proposing agency (see "Opportunity for Public Comment" at the beginning of all regulations appearing in the Proposed Action on Regulations section of the Maryland Register). (See SG, §10-112)
- By petitioning an agency to adopt, amend, or repeal regulations. The agency must respond to the petition. (See SG §10-123)
- By petitioning an agency to issue a declaratory ruling with respect to how any regulation, order, or statute enforced by the agency applies. (SG, Title 10, Subtitle 3)
- By petitioning the circuit court for a declaratory judgment on the validity of a regulation when it appears that the regulation interferes with or impairs the legal rights or privileges of the petitioner. (SG, §10-125)
- By inspecting a certified copy of any document filed with the Division of State Documents for publication in the Maryland Register. (See SG, §7-213)

REGULATIONS CODIFICATION SYSTEM

Under the COMAR codification system, every regulation is assigned a unique four-part codification number by which it may be identified. All regulations found in COMAR are arranged by title. Each title is divided into numbered subtitles, each subtitle is divided into numbered chapters, and each chapter into numbered regulations.

09.12.01.01D(2)(c)(iii)
 Title Subtitle Chapter Regulation Subsection Paragraph Subparagraph

A regulation may be divided into lettered sections, a section divided into numbered subsections, a subsection divided into lettered paragraphs, and a paragraph divided into numbered subparagraphs.

Cumulative Table of COMAR Regulations Adopted, Amended, or Repealed

This table, previously printed in the Maryland Register lists the regulations, by COMAR title, that have been adopted, amended, or repealed in the Maryland Register since the regulations were originally published or last supplemented in the Code of Maryland Regulations (COMAR). The table is no longer printed here but may be found on the Division of State Documents website at www.dsd.state.md.us.

Table of Pending Proposals

The table below lists proposed changes to COMAR regulations. The proposed changes are listed by their COMAR number, followed by a citation to that issue of the Maryland Register in which the proposal appeared. Errata pertaining to proposed regulations are listed, followed by “(err)”. Regulations referencing a document incorporated by reference are followed by “(ibr)”. None of the proposals listed in this table have been adopted. A list of adopted proposals appears in the Cumulative Table of COMAR Regulations Adopted, Amended, or Repealed.

Promulgation of Regulations

An agency wishing to adopt, amend, or repeal regulations must first publish in the Maryland Register a notice of proposed action, a statement of purpose, a comparison to federal standards, an estimate of economic impact, an economic impact on small businesses, a notice giving the public an opportunity to comment on the proposal, and the text of the proposed regulations. The opportunity for public comment must be held open for at least 30 days after the proposal is published in the Maryland Register.

Following publication of the proposal in the Maryland Register, 45 days must pass before the agency may take final action on the proposal. When final action is taken, the agency must publish a notice in the Maryland Register. Final action takes effect 10 days after the notice is published, unless the agency specifies a later date. An agency may make changes in the text of a proposal. If the changes are not substantive, these changes are included in the notice of final action and published in the Maryland Register. If the changes are substantive, the agency must repropose the regulations, showing the changes that were made to the originally proposed text.

Proposed action on regulations may be withdrawn by the proposing agency any time before final action is taken. When an agency proposes action on regulations, but does not take final action within 1 year, the proposal is automatically withdrawn by operation of law, and a notice of withdrawal is published in the Maryland Register.

Title 08 DEPARTMENT OF NATURAL RESOURCES

Subtitle 02 FISHERIES SERVICE

Notice of Proposed Action

[16-174-P]

The Secretary of Natural Resources proposes to:

- (1) Adopt new Regulation **.06** and amend Regulation **.10** under **COMAR 08.02.08 Shellfish — General**.
- (2) Amend Regulation **.03** under **COMAR 08.02.12 Endangered and Threatened Fish Species**; and

Statement of Purpose

The purpose of this action is to list Jonah Crab (*Cancer borealis*) as in need of conservation and adopt both recreational and commercial management measures which are based on the current status of the stock, biology, fishery, and economic and management considerations. Another purpose of this action is to correct the spelling of the scientific name of Atlantic menhaden and make corrections to the requirements of a lobster trap.

According to the information in the Atlantic States Marine Fisheries Commission (ASMFC) Interstate Fishery Management Plan for Jonah Crab, Jonah crab is in need of protection against the potential negative impacts resulting from an unregulated fishery. Implementation of a coastwide conservation program is required.

“Conserve” means to use all methods and procedures for the purpose of increasing the number of individuals within a species or population up to the optimum carrying capacity of their habitat and maintaining these levels. Methods of conservation include activities associated with scientific resources management, such as research, census, law enforcement, habitat acquisition and maintenance, propagation and live trapping and transplantation, including the

periodic or total protection of species or populations as well as regulated taking.

The proposed action adds Jonah crab to the in need of conservation list and creates rules for both the recreational and commercial fisheries. These measures are necessary to conserve the crabs in alignment with coastal criteria and recommendations. Sound conservation and management measures prevent overfishing and achieve, on a continuous basis, the optimum yield from each fishery. The proposed action also corrects the spelling of the scientific name for Atlantic menhaden (*Brevoortia tyrannus*). This was a typographical error when the menhaden regulation was first proposed. One of the measures in the Jonah crab plan is for harvesters directing their efforts on catching Jonah crab to use a lobster trap that conforms to the ASMFC Interstate Fishery Management Plan for American Lobster. Those requirements are slightly different than what is described in the current lobster regulation. The proposed action clarifies that the escape vents need to be in the parlor section of the lobster trap and that the volume may not exceed 22, 950 cubic inches.

Jonah Crab (*Cancer borealis*)

Current Status of Stock

The current status of the stock is unknown. Unregulated harvest of Jonah crab may compromise the sustainability of the resource. The ASMFC Interstate Fishery Management Plan for Jonah Crab identified the lack of regulations in state and federal waters and permit/license requirements as problematic.

Landings have rapidly increased in the past 10 years and without new controls, effort could increase in an unregulated manner and the long-term availability of this resource for harvest could be compromised. Prior to the ASMFC Interstate Fishery Management Plan for Jonah Crab, there were no minimum size protections, nor were there regulations to protect spawning biomass, including restrictions on the harvest of females or egg carrying females. Moreover, unregulated harvest of Jonah crab with gears other than lobster traps has the potential to create a new directed fishery that does not conform with the intention of the ASMFC Interstate Fishery Management Plan for Jonah Crab. In addition, the development of a

new directed trap fishery could compromise the effectiveness of the Large Whale Take Reduction Plan.

Biology

Jonah crab is distributed in the waters of the Northwest Atlantic Ocean primarily from Newfoundland, Canada, to Florida, though a few specimens have been reported as far south as Bermuda (Haefner 1977; Drew 2011). The largest recorded Jonah crab was a male caught in Canada and measured 222 mm (8.7"); females generally do not exceed 150 mm (5.9") (Robichaud et al. 2000). Sea sampling of commercial fishing gear conducted in Maine on 7,131 crabs (Reardon, 2003) and Southern New England on 8,392 crabs (CFRF, unpublished data) indicate similar size distributions with only 2-4% of females and 69-71% of males captured greater than 5". Examination of the data suggests that both sexes reach near 100% maturity by 90 mm (3.5"). Females as small as 94 mm (3.7") have been recorded as carrying eggs by commercial fishermen participating in the Lobster/Jonah Crab Research Fleet Pilot Program administered through the Commercial Fisheries Research Foundation.

Jonah crab are omnivorous and consume a variety of species, including snails, mussels, urchins, algae, and arthropods, among other benthic invertebrates. American lobster (Ojeda and Dearborn 1991) and fish are predators of Jonah crab, particularly at smaller sizes. The apex trophic level of marine ecosystems is commonly targeted by fisheries because it is usually comprised of animals that represent the highest food and commercial value. As apex predators become depleted in areas of high fishing pressure, the fishery target will shift to species of lower trophic levels, a concept known as "fishing down marine food webs." In regions where top trophic levels have been heavily harvested, Jonah crab is becoming a more desirable fishery target. Concurrently, in these areas in the Gulf of Maine, the Jonah crab species has begun to take on the role of apex predator (Leland 2002). Where natural apex predators have become rare, Jonah crab is now primarily responsible for controlling benthic invertebrates.

Fishery

Since 1990 on average 95% of the coastwide landings have come from pots and traps; less than 1% of the catch was identified to come from dredges and trawls. In the early 1990s ex-vessel coastwide values were approximately \$1 to \$1.5 million dollars. Ex-vessel value increased in 2005 to \$3.5 million. From 2007 to 2011 ex-vessel value fluctuated from \$4.5 to \$5.6 million dollars, and reached an estimated \$12.7 million in 2013.

Jonah crab in Maryland is predominately a bycatch species in the American lobster fishery. Maryland landings are estimated at less than 1% of the coastwide landings, yet are very important to fishery participants and allow for income to offset reductions in other fisheries. Some Maryland lobstermen declaw the Jonah crab at sea. This historical practice of declawing the Jonah crab is currently permitted in the ASMFC Interstate Fishery Management Plan only for fishing vessels from states with a history of claw-only landings before the control date of June 2, 2015 (i.e., Maryland, Delaware, Virginia, and New Jersey). Maryland lobstermen remove both claws from the large male Jonah crab and return the crab to the ocean while other lobstermen retain and land the whole crab. The local dockside market is steady and expanding. Some lobstermen are exploring alternative markets such as claw clusters and picked claw meat. The value of the Maryland Jonah crab fishery is estimated at \$150,000 based on confidential fisherman and dealer reports.

Economic Considerations

Jonah crab is valuable to seafood consumers who do not or cannot fish themselves. Fishing vessels and seafood distributors engaged in

the commercial harvesting and marketing of Jonah crab produce expenditures and generate employment in the course of business activities. The economic impact in Maryland from enforcing the current coastwide ASMFC Interstate Fishery Management Plan should have no negative outcomes because the participants are generally compliant or exceed the management measures. Compliance should protect the market and allow for sustainability in the future. An ASMFC noncompliance finding resulting from not implementing the conditions of the fishery management plan would require a fishery shutdown and loss of revenue estimated at \$150,000 not including indirect costs (e.g., bait, ice, fuel).

Management Considerations

The ASMFC Interstate Fishery Management Plan for Jonah Crab requires commercial and recreational fisheries management measures in Maryland. The commercial management measures are as follows: 1) Participation in the directed trap fishery is limited to only those vessels and permit holders that already hold a federal lobster permit or can prove prior participation in the Jonah crab fishery before the control date of June 2, 2015; 2) All traps must conform to specifications of the lobster management plan, including the trap tag and escape vent requirements; 3) Landing of Jonah crab by all other individuals would require an incidental permit from a state or federal agency for the appropriate jurisdiction in which the vessel is fishing and would be subject to landing limits; 4) Mandatory reporting for dealers and harvesters; 5) Fishery dependent sampling; 6) A minimum size of 4.75 inches with no tolerance; 6) A prohibition on the retention of egg-bearing females; and 7) Only whole crabs may be retained and sold with the exception of individuals who can prove a history of claw landings before the June 2, 2015, control date in the states of New Jersey, Delaware, Maryland, and Virginia.

The recreational management measures consist of a 50-crab daily possession limit of any size and a prohibition on the possession of egg bearing females.

Title 31

MARYLAND INSURANCE ADMINISTRATION

Subtitle 15 UNFAIR TRADE PRACTICES

Notice of Proposed Action

[16-012-R]

The Insurance Commissioner proposes to:

(1) Amend Regulations .01 — .07 under **COMAR 31.15.04 Solicitation of Annuity and Deposit Fund Contracts**; and

(2) Adopt new Regulations .01 — .09 under a new chapter, **COMAR 31.15.15 Annuity Disclosure**.

Because substantive changes have been made to the original proposal as published in 43:1 Md. R. 76—83 (January 8, 2016), this action is being repropose at this time.

Statement of Purpose

The purpose of this action is to adopt the National Association of Insurance Commissioners' (NAIC) "Annuity Disclosure Model Regulation," Model MDL-245. This Model Regulation addresses many of the same issues found in current COMAR 31.15.04, but in more detail. Model MDL-245 was adopted by the NAIC in 1999 and has been amended in 2011 and 2013. Maryland's current chapter, COMAR 31.15.04, which applies to both annuities and deposit fund contracts, has not been amended since its adoption in January 1980. The NAIC Model provides more detailed requirements for annuity illustrations and conforms COMAR to the modern annuity marketplace. The purpose of this reproposal is to correct a cross-reference and to provide an exception from considering actuarial assumptions in the dividend scale formula as a nonguaranteed element for the annuity illustrations for insurers that offer both participating and nonparticipating annuities.

Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

Estimate of Economic Impact

I. Summary of Economic Impact. The change to the illustration requirement for insurers that offer both participating and nonparticipating annuities in this repropose regulation will make it easier for insurers to sell participating annuities. This will have a minimal effect on the market as very few insurers offer participating annuities in Maryland.

II. Types of Economic Impact.	Revenue (R+/R-)	Magnitude
	Expenditure (E+/E-)	
A. On issuing agency:	NONE	
B. On other State agencies:	NONE	
C. On local governments:	NONE	
	Benefit (+) Cost (-)	Magnitude
D. On regulated industries or trade groups:		
(1) Compliance costs	(-)	Minimal
(2) Participating annuities	(+)	Minimal
E. On other industries or trade groups:	NONE	
F. Direct and indirect effects on public:	NONE	

III. Assumptions. (Identified by Impact Letter and Number from Section II.)

D(1). The proposed amendments will have a minimal impact on insurers that issue annuities in Maryland. Some insurers may incur additional administrative costs related to implementing the more detailed annuity disclosures required by the adoption of the NAIC Model. Larger insurers who issue annuities in the national or regional markets would likely see some cost savings, as their annuity disclosures would no longer need to be written to comply with the outdated Maryland regulations. The Commissioner does not believe that any additional costs will be significant, relative to the benefit to the insurer through the use of a national standard annuity disclosure and the benefit to the consumer of the improved disclosure that these amendments provide.

D(2). The change in the repropose regulations regarding the illustration requirement for insurers that offer both participating and nonparticipating annuities may make it easier for impacted insurers to sell participating annuities. This will have a minimal effect on the current market as very few insurers offer participating annuities.

Economic Impact on Small Businesses

The proposed action has minimal or no economic impact on small businesses.

(3) Notify the applicant in writing of the Board's determination.

.08 Determining Disqualifying Work; Recapture of Tax Credits.

A. Upon the request of the Comptroller or on the Director's own initiative, the Director shall determine whether any disqualifying work has occurred during a certified rehabilitation or during the recapture period that would make the rehabilitation ineligible for a tax credit under the Program, and shall promptly notify the Comptroller of the Director's determination.

B. A tax credit awarded and claimed through the Program shall be recaptured if during either the rehabilitation or the recapture period:

(1) Any disqualifying work is performed on the structure that was the object of the certified rehabilitation; or

C. A tax credit shall be recaptured as follows:

(1) If disqualifying work or disposition occurs during the taxable year in which the certified rehabilitation was completed, 100 percent of the tax credit shall be recaptured;

(2) If disqualifying work or disposition occurs during the first full year after the taxable year in which the certified rehabilitation was completed, 80 percent of the credit shall be recaptured;

(3) If disqualifying work or disposition occurs during the second full year after the taxable year in which the certified rehabilitation was completed, 60 percent of the credit shall be recaptured;

(4) If disqualifying work or disposition occurs during the third full year after the taxable year in which the certified rehabilitation was completed, 40 percent of the credit shall be recaptured; or

(5) If disqualifying work or disposition occurs during the fourth full year after the taxable year in which the certified rehabilitation was completed, 20 percent of the credit shall be recaptured.

D. The business entity that claimed the tax credit shall pay the recaptured amount of the tax credit as taxes payable to the State for the taxable year in which the disqualifying work or disposition occurred.

NOTICE OF TRIENNIAL REVIEW OF WATER QUALITY STANDARDS — 2016

2016 Triennial Review of Water Quality Standards

The Clean Water Act (CWA) requires that States review their water quality standards every three years (Triennial Review) and revise the standards as necessary. A water quality standard consists of three parts:

1. **Designated Uses** that set goals for a water body. Examples are support of aquatic life, drinking water supply or a coldwater fishery such as trout.
2. **Criteria** that support the designated uses. There are numerous criteria for chemical substances, bacteria, acidity and physical characteristics (e.g., temperature). Examples include dissolved oxygen sufficient to support aquatic life or metals in sufficiently low concentrations that they will not interfere with aquatic life.
3. **Antidegradation policy.** Maryland has a policy in place, and updates the list of high quality waters each triennium if needed.

The Maryland water quality standards are found in the Code of Maryland regulations (COMAR) at 26.08.01 – 26.08.02. Maryland regulations may be accessed online at the Division of State Documents web site: www.dsd.state.md.us. Click on COMAR Online and enter the appropriate regulatory reference.

Prior to initiating any formal rule-making process, MDE is providing stakeholders an opportunity to present recommendations, voice concerns, and provide input on the State's water quality standards for MDE to consider for amendment and addition.

With this announcement, the Science Services Administration (SSA) at MDE is soliciting public input on its current review of the Water Quality Standards. Topics currently being reviewed by SSA are presented below. SSA invites stakeholder comments and suggestions and will consider them if the necessary data are available to make the appropriate determination(s). A subsequent promulgation of new water quality standards may include topics not included in this proposal.

Comments on the following topics and on additional issues that the public thinks should be addressed during this Triennial Review period should be submitted to Matthew Stover at matthew.stover@maryland.gov or by mail to Mr. Matthew Stover, Science Services Administration, Maryland Department of the Environment, 1800 Washington Blvd, Baltimore MD 21230.

Schedule

Depending on the comments received in response to this notice, MDE plans to formally propose new and/or revised regulations by fall of 2016, and submit a final notice on these regulations by the end of the year.

**PROPOSED WATER QUALITY STANDARDS
AMENDMENTS**

DESIGNATED USES

MDE is investigating options for refining the Use Class IV and IV-P definitions and identifying representative aquatic life genera that are associated with cool water streams.

WATER QUALITY CRITERIA

Ammonia Criteria

The United States Environmental Protection Agency published final revised national recommended Clean Water Act 304(a) aquatic life water quality criteria for ammonia in fresh water in the Federal Register on August 22, 2013. The revised criteria incorporate up-to-date toxicity data reflecting freshwater unionid mussel and non-pulmonate (gill-bearing) snail sensitivity. MDE is considering these updated national criteria for adoption into state regulations.

Recreational Criteria

In November 2012, the United States Environmental Protection Agency released new recommendations for recreational water quality criteria to meet the requirements of the amendments to the Clean Water Act by the Beaches Environmental Assessment and Coastal Health (BEACH) Act of 2000, the federal law that refined standards for water quality at public beaches.

Although they are based on different definitions of illness and different rates of illness, these recommended criteria provide a protection level similar to the current codified criteria. As required by the BEACH Act, MDE is planning on adopting these criteria into regulation.

ANTIDEGRADATION

Modifications to List of Tier II Waters (COMAR 26.08.04-1 O)

Based on recently collected data and analysis of historical data, a total of 31 Tier II stream segments have been identified as high quality.

Due to biological index recalculation, a total of 32 stream segments have been identified as NOT being high quality. This is not based on a change to water quality. Also, three segments were listed more than one time under different names and will be removed from the list to correct these mistakes.

Administrative and editorial corrections have been identified for amendment.

**MARYLAND INSURANCE
ADMINISTRATION**

**IN THE MATTER OF CLAIMS MADE
POLICIES, ENDORSEMENTS,
RIDERS OR BINDERS BEFORE THE
MARYLAND INSURANCE
ADMINISTRATION
CASE NO: MIA-2016-06-008**

Rescission Order

On September 29, 1986, Assistant Commissioner Thomas P. Raimondi issued a Memorandum and Order in case number 13846-6/86 ("the 1986 Order") following a hearing on the subject of claims made policies, endorsements, riders or binders. The 1986 Order stated in pertinent part:

"Any policy issued on a claims made basis shall include, at the option of the insured, an offer to purchase an extended reporting period. Any limitation to this contractual right must be prior approved by the Maryland Insurance Division. In any event, the insurer shall include in all form filings for claims made policies the availability of an unlimited extended reporting period subject to the underwriting standards of the insurer. Filings already approved shall be amended to comply with the above direction."

In consideration of changes in Maryland's marketplace for claims made policies since 1986, the Maryland Insurance Administration has determined that the requirements of the 1986 Order are no longer necessary. Accordingly, this Order repeals the 1986 Order in its entirety, effective the date of this Order. The Maryland Insurance Administration notes that Bulletins 10-36 and 10-36 Amended from November 3, 2010 and December 17, 2010, which address the 1986 Order, are no longer applicable.

It is Ordered that a copy of this Memorandum and Order be published in the

Maryland Register and be placed on the website of the MIA.

SO ORDERED this 6th day of June, 2016.

Subject: Public Notice — Chesapeake Bay Commercial Mature Female Hard Crab Catch Limit and Crew Requirements

Add'l. Info: The Maryland Department of Natural Resources Fisheries Service (MDNR) announces a revision of the commercial mature female hard crab bushel limits and closure periods for 2016 for the Chesapeake Bay and its tidal tributaries pursuant to COMAR 08.02.03.14. Notwithstanding COMAR 08.02.03.11A(5), there are no closure periods for female harvest in 2016. The daily commercial mature female hard crab bushel limits beginning July 1, 2016, and extending the harvest of mature females from November 10, 2016 to November 30, 2016, are as follows:

BUSHEL LIMITS BY LICENSE TYPE				
Season	LCC	TFL or CB3	TFL with CB6 or CB3 with CB6	TFL with CB9 or CB3 with CB9
July 1 — Aug 31	2	10	14	17
Sept 1 — Oct 31	5	19	29	35
Nov 1 — Nov 30	2	9	13	20

The above acronyms stand for: LCC — Limited Crab Harvester License 50 pots; CB3 — Crab Harvester License 300 pots; CB6 — 600 pot authorization; CB9 — 900 pot authorization; and TFL — Unlimited Tidal Fish License.

Mature female hard crab bushel limits and closure periods are being revised based on harvest levels, which have been below the established target for 8 consecutive years, and the results of the 2015—2016 winter crab dredge survey conducted by the MDNR and the Virginia Institute of Marine Science.

As described in Natural Resources Article, §4-814, Annotated Code of Maryland, a 600 pot authorization (CB6) requires the license holder to have one crew member in addition to him/herself and a 900 pot authorization (CB9) requires the license holder to have two crew members in addition to him/herself on board. These additional crew members must be on board the vessel in order for the licensee to harvest at the bushel limit assigned to a CB6 or CB9. If crew members are not on board, then the licensee is restricted to the TFL or CB3 bushel limits.

DEPARTMENT OF STATE POLICE HANDGUN ROSTER BOARD

Official Handgun Roster—July 1, 2016

The following is a list of handguns manufactured after January 1, 1985, that have received final approval by the Handgun Roster Board and that are not otherwise prohibited by law.

Manufacturers are listed alphabetically. Be advised that the Handgun Roster has been amended in accordance with Senate Bill 619, Chapter 456 of the Laws of Maryland, effective June 1, 1994, which prohibits the sale of certain assault pistols in the State of Maryland. Please consult the law or Firearms Bulletin 94-1, which is available from the Maryland State Police Licensing Division.

Additionally, Senate Bill 281 prohibits detachable magazines with a capacity of more than 10 rounds of ammunition.

It is unlawful to manufacture for distribution or sale or to sell or offer for sale in Maryland any handgun manufactured after January 1, 1985 that is not officially on the Handgun Roster, except for the manufacture of prototype models required for design, development, testing, and approval by the Board. Neither the State of Maryland nor any agency, officer, or employee of the State assumes any liability for injuries caused by any handgun on the Handgun Roster.
